FROM THE DIRECTOR'S DESK

“Fight Fraud Kansans reported more than \$10 million lost to fraud in 2019, and AARP wants to make sure residents don't fall victim to common scams this year. Impostor scams and identity theft were among the most popular techniques thieves used last year, accounting for more than 1 in 3 fraud reports, according to data from the Federal Trade Commission.

AARP Kansas and the AARP Fraud Watch Network can help consumers learn to identify, report and get information about the latest tricks fraudsters are employing. Residents also can find out how to avoid impostor scams, identity theft and online fraud. Sign up for AARP Watchdog Alerts at aarp.org/fraud.

Kansans who want to volunteer to join the Fraud Watch Network to provide information for community groups can email ksaarp@aarp.org or call (866) 448-3619.”

Thank you Volunteers!!

Volunteers are the backbone of our programs. Not only do they provide transportation to seniors in this community, they also provide them with companionship. The Clearwater Senior Center is looking for drivers who have time to spare during the week, even if it is only a couple days a month. Any help is appreciated! Anyone interested, please contact the director at (620) 584-2332.

Carry-In Picnic

All were welcomed to our monthly luncheon at the City Park. We were glad to get out and visit with our friends after being semi-quarantined due to COVID-19. Clearwater City Manager, Ron Marsh and City Clerk, Courtney Meyer joined us for lunch and then brought us up to date on some of the changes and businesses coming to town. One item is the proposed shelter houses at the park. If you have questions you can contact City Hall for more information.

July Birthstones

One of the most popular traditional jewelry stones, ruby is exceptionally durable. Its colors — always red — can reach vivid levels of saturation. Fine-quality rubies are some of the most expensive gemstones, with record prices over \$1,000,000 per carat. However, rubies are also subjected to more treatments than almost any other gem.

COLOR: ALL VARIETIES OF RED, FROM PINKISH, PURPLISH, ORANGEY, BROWNISH, TO DARK RED.

[GEMSOCIETY.ORG/ARTICLE/BIRTHSTONE-CHART](https://www.gemsociety.org/article/birthstone-chart)

Ruby is the July birthstone – and it's one of the most coveted of gems. The name is derived from the Latin word *ruber*, meaning “red” – the color of love and passion. Few things catch the eye like the ruby birthstone. The finest color of the birthstone for July is a deep red with a hint of purple, called “pigeon’s blood” in the trade. A variety of the mineral corundum, ruby gets its color from trace amounts of the element chromium. The more chromium, the stronger the red. Here’s what you need to know about this beautiful July birthstone so you can better choose one for yourself or a loved one who was born in the month of July.

RUBY BIRTHSTONE MEANING & HISTORY

In ancient India, ruby was called the “king of precious stones” for its rarity, hardness (second only to diamond), beauty and seemingly mystical powers. Long associated with the life force blood, ruby was a symbol of power and youthful energy in Indian jewelry. In past centuries, some believed this

birthstone for July could predict misfortune or danger, and others claimed it would cure inflammatory diseases and soothe anger. Burmese warriors believed it made them invincible in battle. Medieval Europeans maintained that rubies bestowed health, wisdom, wealth and success in love.

In addition to being the July birthstone, ruby is traditionally given for the 15th and 40th wedding anniversaries.

The Luc Yen region in northern Vietnam, where rainforest-clad mountains rise over broad paddy fields, pro-

WHERE ARE RUBIES FOUND?

Our search for the July birthstone starts in Myanmar (formerly known as Burma), one of the oldest recorded sources of fine rubies. For more than five centuries, the Mogok area in Myanmar has produced some of the most sought-after rubies – vibrant red beauties softened by light-scattering inclusions and a glowing red fluorescence. The region is a place of weathered marble and ancient Buddhist temples.

duces rubies of red to purplish red color. Farther south, the Quy Chau district has also yielded many fine rubies. Today, artisanal miners work the soil in hopes of finding a gem that will change their fortunes.

Mozambique is an important new source for the July birthstone. This African nation is home to the prolific mines at Montepuez. Rubies found there have been compared to the famed gems of Mogok. For many years in the late 1900s, the ruby deposits along the border between Thailand and Cambodia were the major source of rubies in the marketplace. Other important producers of the July birthstone include Afghanistan, Tajikistan, Pakistan, Sri Lanka, Kenya, Tanzania and Madagascar.

Rubies are often heat treated to remove purplish coloration, leaving a purer red. The process can also remove “silk” (minute needle-like inclusions) that can cause a gem to appear lighter in tone and be more opaque. The trade typically accepts heat treatment, as it is stable to normal conditions of wear and care. However, rubies may also be subjected to lattice diffusion treatment and dyeing. In lower-quality material, surface-reaching fractures and cavities may be filled with a glass to decrease their visibility so the gem appears more transparent. Some of these treatments may make the ruby more vulnerable to damage during normal wear and care.

Before you buy, always ask if your ruby has been treated and by what method. The Federal Trade A GIA Identification is important in identifying if a stone is natural or synthetic and whether it has been treated in any fashion.

In most cases, the July birthstone can be safely cleaned with warm soapy water and a soft brush. Ultrasonic and steam cleaners are usually safe for untreated, heat-treated and lattice diffusion–treated stones. Glass-filled or dyed stones should only be cleaned with a damp cloth.

Whether or not you have a July birthstone, owning a beautiful ruby is a rare and precious thing..
